
Log long-run spending by year (weighted histogram) against a normal curve with the same mean and SD
1994: skew -0.23, kurtosis +0.4
1995: skew -0.16, kurtosis +0.6
1996: skew -0.35, kurtosis +1.1
1997: skew -0.36, kurtosis +1.1
1998: skew -0.32, kurtosis +0.8
1999: skew -0.32, kurtosis +1.3
2000: skew -0.55, kurtosis +2.1
2001: skew -0.36, kurtosis +1.2
2002: skew -0.55, kurtosis +1.8
2003: skew -0.70, kurtosis +3.6
2004: skew -0.53, kurtosis +1.8
2005: skew -0.48, kurtosis +2.1
2006: skew -0.44, kurtosis +1.9
2007: skew -0.42, kurtosis +1.9
2008: skew -0.45, kurtosis +1.8
2009: skew -0.55, kurtosis +2.2
2010: skew -0.53, kurtosis +2.8
2011: skew -0.53, kurtosis +2.2
2012: skew -0.34, kurtosis +1.4
2013: skew -1.23, kurtosis +7.6

2012
own a computer (%)
age of the reference person

1994-1996: states with 100+ units (dot area = units)
state suppressed
own a computer (%)
state's mean log long-run spending
2002-2004: states with 100+ units (dot area = units)
own a computer (%)
state's mean log long-run spending
2010-2012: states with 100+ units (dot area = units)
own a computer (%)
state's mean log long-run spending

Ownership among very low spenders
everyone else
more than 3 SDs below the year's mean
